DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 2 is unclear because it appears "wherein at least one of the band electrode and the band connector" should be --wherein the at least one band electrode and the at least one band connector--.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Winkler (US 5417208). Winkler discloses an electrode-carrying catheter with a seamless insulator (20), a conductor (45), and multiple electrodes (30a) comprising band electrodes/ connectors (53) and conductive pads (51) (figures 1, 2, 4A-4D and 6; col. 5 @ 58-64). The copper ribbon conductive pad (51) is joined by welding (col. 3 @ 20-26), and is located within a welding region, the location on the catheter where the electrode is electrically connected to the conductor

by welding. The band electrode/ connector (53) is also welded (col. 8 @ 8-9), electrically connecting the conductive pad (51), the band (53) and the conductor (45).
